Tata Studi LEARner Profile

Tata Studi-LEARner Profile is a self-discovery assessment to give your learning profile a LEAP. It makes you introspect and discover your current study habits, suggests ways to use research-backed learning strategies, and helps you become an excellent learner for life.

A self-reflection assessment on six dimensions of learning to create your LEARner Profile (LEAP).

Desire to learn

Find out the level of motivation, interest and effort you put into learning.

Plan to learn

Find out if you are planning smartly to learn better.

Use learning strategies

Find out if you know "how to learn" techniques.

Understand to learn

Find out if your study habits help you retain knowledge longer.

Reflect to learn

Find out if you use the feedback on your learning to enhance your knowledge.

Develop a growth mindset

Find out how your brain reacts to learning challenges.

You will receive a personalised report at the end of the assessment. Your LEAP report gives an insight into your current learning behaviour, identifies the course correction required, and suggests scientific learning strategies to overcome learning challenges and enhance your academic performance.
